

CyberSentinel AI: Security Analysis Report

File: ml_demo.log

Uploaded: 2026-10-08 19:35 UTC

Report generated: 2026-10-08 19:36 UTC

Events parsed: 97 | Unreadable lines skipped: 0

Summary

3 potential threat(s) were detected across 97 events (1 high, 2 medium). The most severe finding is "Sensitive Path Access Without Login" from source 203.0.113.50.

Severity	Findings
CRITICAL	0
HIGH	1
MEDIUM	2
LOW	0

Findings

[HIGH] Sensitive Path Access Without Login

Source: 203.0.113.50 | Time: n/a

Why flagged: Requested /.env with no prior successful authentication from this source.

Evidence lines: 97

Recommended actions:

- Check the server's access controls
- Review other requests from this IP
- Consider blocking the source

[MEDIUM] Anomalous Behavior (ML)

Source: 172.16.0.5 | Time: n/a

Why flagged: Activity differs from the learned normal baseline. Biggest differences: total_events = 86 (typical: 11.2); access_events = 85 (typical: 9.1); distinct_paths = 1 (typical: 4.5).

Evidence lines: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23

Recommended actions:

- Review this source's activity in the raw logs
- Check whether this behavior is expected for this user or system
- Treat as a lead to investigate, not a confirmed attack

[MEDIUM] Anomalous Behavior (ML)

Source: 172.16.0.9 | **Time:** n/a

Why flagged: Activity differs from the learned normal baseline. Biggest differences: sensitive_hits = 6 (typical: 0.1); failure_ratio = 0 (typical: 0.4); failed_logins = 0 (typical: 1.1).

Evidence lines: 90, 91, 92, 93, 94, 95, 96

Recommended actions:

- Review this source's activity in the raw logs
- Check whether this behavior is expected for this user or system
- Treat as a lead to investigate, not a confirmed attack

How to read this report

Rule-based findings follow explicit, documented rules. Findings marked (ML) come from a statistical model that flags behavior unlike its training baseline; treat them as leads to investigate, not confirmed attacks. Severity is an estimate and should be verified by a person before any action is taken.
